Electric pump control and protection system

Applications.

Domestic pressure boosting
(single and multi-family dwellings)

Small irrigation and gardening

Civil water systems (bathing
establishments, campgrounds,
sporting facilities)

Xylem introduces Genyo, the new range
of compact electronic devices, pressure/
flow switches for control and protection of
electric pumps.

Genyo is controlled by an electronic circuit
and is composed of a diaphragm and
counteracting spring system integrated
with flow and pressure sensors.

Genyo enables automatic control of pump
start-up and shutdown based on actual
water demand, preventing any pressure
fluctuations at delivery points with constant
operating point.

Genyo integrates multiple system controls
into a single device.

Benefits.

Protection against dry running integrated in
the device

No maintenance required (a convenient
alternative to traditional diaphragm
surge tanks)

Quick and easy installation

Compact size

Stable pressure without fluctuations at
constant operating point

Back-up tank to compensate for small leaks
or drips in the hydraulic system (patented
system)

Limited flow resistance

For GENYO 16A model only.

Automatic restart in case of water failure

Adjustable starting pressure
